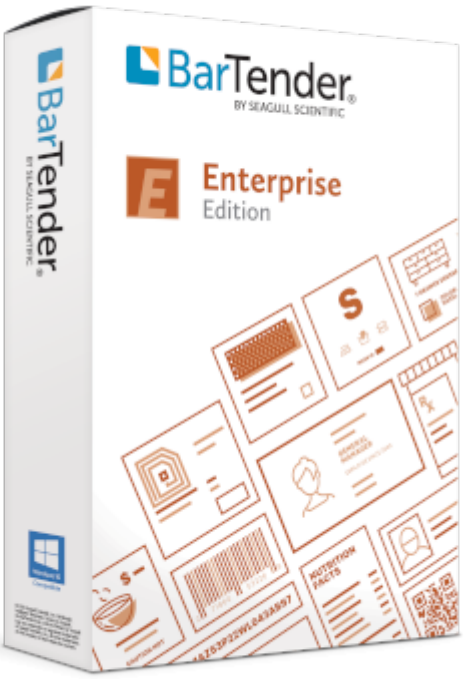
BarTender Enterprise: multiuser Application license + License for 10 printers (includes 1 year Maintenance)

Software for design and print of labels, bar codes, cards and RFID tags. It supports over 20 languages. Bartender is ideal product for labeling or printing on demand, including label design, print and application of direct marking on packages, coding of chip cards and many more. It is available in 4 versions. All of the editions are available as 64-bit applications as well as 32-bit applications for Microsoft Windows.

For different types of use are manufactured more different versions:



- BarTender Starter - single user version, unlimited number of printers. The data of the label can be sourced from text or Excel file. RFID isn¤t supported
- BarTender Professional - all of the standard functionality include RFID
- single user version, unlimited number of printers (Workstation version), or
- multi-user version, the number of printers is limited by the purchased license (BTP-2 for 2 printers, BTP-5 for 5 printers, etc.)
- BarTender Automation
- BarTender Enterprise

All of the full versions (i.e. exclude the licenses for additional printers, updates or upgrades) include the one-year e-mail support and on-line update - Maintenance.

If you have any questions about previous versions of Bartender Professional and have access to the new version, please contact us.
