

CPT-8400 Portable Terminal, 2D imager, 29 keys, 16 MB + microSD card slot

The CPT - 8400/8470 is portable data terminal with proprietary OS and quality laser or CCD scanner. Monochromatic LCD is well seen at direct sun. For wireless communication has CPT 8400/8470 WiFi module. The 8470 mobile computer enables smarter decisions and improves business agility by taking powerful data applications directly to the point of work. Available only until stock supplies last!

CPT-8400/8470 mobile terminal is determined for use in demanding environments, so it is equipped with covers made of hard plastic, sealed against dust and water. Resistance rubber, which the device is covered with, helps it to withstand drops, everywhere such accidents may happen. This ensures accurate identification and data collection, despite adverse conditions. The basic memory of the unit is 4 MB, but it can be easily extended, because the device has a microSD card slot. The device can transmit the collected data via the USB or RS-232 communication interface with a rechargeable unit or via a communication cable, which can also charge the device.

Wireless capabilities give easy access to peripherals and servers, keeping workers in-touch and always a step ahead of the task at hand. The largest-in-class backlit, 2.6-inch, 160x160 pixel display makes work simple, even in dark corners. Drops, humidity, or freezing temperatures won't stop the CipherLab 8470 mobile computer. It's built tough to work on the edge.

Main features of CipherLab 8400 / 8470 Portable Terminal:

- proprietary system - good-quality display - hardened case - IP protection 54 - rubbered edges - microSD (SDHC) slot - USB and RS-232 interface - can be connected to PC like USB mass-storage F

ea

io, MIRROR terminal emulation, BLAZE C Compiler and BASIC Compiler Accessories Charging and communication cradle, Ethernet cradle, GPRS/GSM cradle, EDGE/Quad-band, 4-slot battery charger, USB charging and communication cable, protective cover

Technical Description

Functionality & Operation

Operating system	proprietary
Keyboard	with LED backlight
Data retention	25den
CPU Type	32-bit RISC
Display type	LCD
Display type	LED backlight
Expansion slot	Micro SD Card (SDHC)
Memory	4MB
Memory	4MB Flash
Communication interface	USB-VCP, USB, RS232

Optical

Bar code scanner	2D Imager
------------------	-----------

Electrical

Main battery pack operating time	110hod
----------------------------------	--------

Mechanical

Weight	295g
Dimensions	Width: 72mm, Height: 40mm Length: 170mm

Environment

Electrical static discharge	±8kV contact, ±15kV air
-----------------------------	-------------------------
