

## Inline Matrix remover for OKI Pro1050 Label Printer

Designed to be installed and work in-line to OKI Pro Series Printers (Pro1050, Pro1040), the Matrix Remover is an all-in-one system capable of removing the waste material from the pre die-cut media and rewinding on a 3" cardboard core with the finished printed labels face out. The unit is equipped with an external auto-switching 100/240VAC - 2.5A at 24V power supply and an electronic circuit in charge of controlling the functions. Perfect bleed labels can be achieved on pre die cut media after the waste material is removed from your artwork with this matrix intact. The production of edge-to-edge printed labels on roll will become extremely easy and quick.
