

Label rewinder for OKI Pro Series Label Printers

The motorized core holder can handle printed media up to 170mm (6.69") wide, and rewind rolls having an outside diameter up to 250mm (9.84") with an internal 3" fixed core. The rewinded rolls will be face out only. The rewinding speed is synchronized automatically by the tension arm while when the roll of labels runs out, the rewinder stops by itself. The unit is equipped with an external auto-switching 100/240VAC - 2.5A at 24V power supply and an electronic circuit controls the functions. Thanks to its revolutionary design and toughness, the rewinder is perfect for high and heavy duty jobs.
